Instructions:

1. Open the map with this URL: https://www.zeemaps.com/map?group=1103779

2. Click "Additions -> Add Marker - Detailed"

3. Input your general location in the dialog box. Please do not put your exact address but just enter some high level location like your city, state and country. Instead, you can also use latitude and longitude as your input. Again, they do not need to be exact but just general. By clicking "Submit", your location will be shared and visible on the map (also visible to the other students or people with this link).
